→ Collected User Feedback

I really liked the first layout (the Black, White, and Yellow one). It looks much cleaner, more professional, and feels easier on the eyes compared to the first one. The white background makes the login form stand out really well, and the black header gives it a stylish, modern vibe. The yellow footer adds a fun, energetic touch without being too distracting. Overall, the second design feels much more user-friendly and welcoming!

One suggestion:

It would be even better and more convenient if there were additional login options like Google and Apple ID login buttons. It would make signing in faster and easier for users.

→ Iterate and Refine:
